

DRIVER DIAGRAM

A driver diagram is a visual tool that maps out your team's plan for improvement, outlining how change will lead to achieving your goals.

To complete your Driver Diagram, start here.

Then, work through your primary and secondary drivers.

Improvement Aim

A clear, measurable goal that defines what you want to improve, for whom, by when.

Primary Drivers

The key factors that directly influence your ability to achieve the improvement aim.

Secondary Drivers

Specific actions or conditions that support and strengthen the primary drivers.

Now, check your logic left to right.

EXAMPLES

Close the discipline gap so that at least 75% of students of all races/ethnicities respond positively to "Discipline at this school is fair" on the next YouthTruth survey.

Strengthen student-teacher relationships in ways shown to reduce discipline gaps and suspension rates for students of color.

← {
New professional development on restorative justice.
Committee to review disciplinary policies and procedures.

Encourage academic risk-taking so that over 80% of all genders respond positively to "In most of my classes, I learn to correct my mistakes" on the next YouthTruth survey.

Teachers use instructional strategies that foster a growth mindset and encourage all students to take academic risks.

← {
Use professional learning days for training on social-emotional learning.
Provide support for faculty to develop their own growth mindset.

Close the discipline gap so that at least 75% of students of all races/ethnicities agree that "Discipline at this school is fair" on the next YouthTruth survey.

Strengthen student-teacher relationships in ways shown to reduce discipline gaps and suspension rates for students of color.

← {
New professional development on restorative justice.
Committee to review disciplinary policies and procedures.
